FOR IMMEDIATE RELEASE

Pacific Eye is Giving the Gift of Sight Through LASIK Surgery for ONE Lucky Central Coast Resident.

(SAN LUIS OBISPO, CA – October, 2009) – This month only, Pacific Eye, leaders in comprehensive eye care on the Central Coast, are giving away the gift of sight! Pacific Eye uses 100% All-Laser IntraLase™ Wavefront® LASIK eye surgery as a practical option to improving eye sight for both nearsighted and farsighted patients.

Pacific Eye's doctors and staff are dedicated to providing perfect vision to the Central Coast. The experienced team of surgeons at Pacific Eye has performed tens of thousands of advanced vision-correcting procedures during the last few decades.

Top of the line technology is crucial to provide the best quality and safest surgical procedures. LASIK is a laser procedure aimed to reshape the cornea. This relatively painless procedure can take as little as 5 minutes to complete, and most patients achieve 20/20 vision or better. The All-Laser IntraLase™ LASIK procedure will give you superior vision with more comfort and faster healing.

LASIK has become the most commonly performed refractive surgery. According to a major analysis by the American Society of Cataract and Refractive Surgery reported in 2008, worldwide satisfaction rates among LASIK patients are 95.4 percent.

Here is what Pacific Eye patients have to say:

"Thanks so much for giving my mom the gift of LASIK eye surgery. It has been a life-changing procedure for her! I really appreciate the opportunity you gave her." Laura W.

"Ever since I had my LASIK surgery done by Pacific Eye things are so much clearer now! Let me see if I can put it in perspective for you; one minute I was watching life through the old analog TV and the next minute I was watching through High Definition plasma. That's the way it is!" Chad Stevens, morning co-host at Mega 97.1 FM

Sign up today; log onto www.KSBY.com, click on "contests" and learn how you can become a potential winner of a FREE All-Laser LASIK procedure.
